product & price guide

Metamark. The Materials Company

Metamark media and materials are trusted the world over. Metamark is specified by leading brands, and chosen by signs and graphics producers looking for quality, technical leadership and value. Metamark media and materials are seen everywhere there's business to promote, messages to communicate and quality to maintain.

Technical leadership and Innovation.

Metamark's advanced manufacturing and conversion processes produce reference-quality media and materials. Metamark's innovation delivers next-generation developments too, such as our Apex and MetaScape systems.

Metamark single component, fully cross-linked Apex adhesive means easier application and repositioning, superior ultimate bond on a wide range of substrates, and reliable, clean removal.

Our MetaScape system allows you to work faster on large coverage areas by enabling air to quickly disperse from beneath the applied material.

Buy Direct

Metamark manufactures and sells direct. Place your order before 6pm and it will be delivered the next working day. Our stock position ensures that your needs are always met. Metamark has the media and materials you need in stock and ready to despatch.

Saturday Pre 10:30am	Delivery Upgrade - add £12
Saturday Pre 9:30am	Delivery Upgrade - add £20
Northern Ireland/Isle of Man £11.50	Free for orders over £130
UK Offshore £29.50	Free for orders over £200
Recorded Post £2.00	Only available on small items

Order direct from Metamark anytime up to 6.00pm for next day delivery with confidence that all materials are available from our comprehensive stocks. Additions can be made to orders at any time during the day and we offer a range of competitively priced timed delivery services. On each order the price band applied is determined by the total metreage or number of rolls on the order. You may add to your order as many times as required during the day. Your total order will determine the price break to be applied and whether the order qualifies for free delivery.

Orders to the UK mainland are despatched to arrive before 5.30pm the next working day. We also offer a range of competitively priced timed delivery upgrades. Deliveries to Northern Ireland and Isle of Man are 2 day, UK Offshore are 3-4 day, and these deliveries cannot be guaranteed.

Discounts for Pallet Quantities

We have introduced a new additional rate for customers buying pallet quantities, the 20+ roll rate. The standard price bands offer discounts for up to 10+ rolls or 5+ rolls on many speciality products.

Payment Methods

We will be pleased to consider opening a credit account which will allow payment at 30 days nett, subject to status, and we also accept payment by MasterCard and Visa credit cards and Maestro and Visa debit cards.

Sample Service

We understand how important it is to you to be able to provide your customer with the necessary colour samples the next working day. We offer free A4 printed and working samples of Digital products, which will be sent the same day by first class post if requested by 4pm.

Sales Office Hours

The Sales Office is open continuously from 09:00 to 18:00 from Monday to Friday.

Metamark MD5 – High Performance Calendered Vinyl

MD5 is a high performance vinyl recommended for application onto most flat or curved surfaces such as vehicle graphics, fleet markings and retail signage. The product is the recommended choice for trouble-free high resolution prints onto most exterior signs. It features a 70 micron vinyl with permanent solvent-based adhesive. MD5-105 is suitable for application onto glass as it has a high level of clarity. MD5 features the latest **Apex** adhesive for your assurance of high performance and clean removal from a permanent adhesive.

- 70 Micron Polymeric Calendered Vinyl
- Permanent Clear Solvent-Based Adhesive
- Layflat PE Liner
- Fire Rating Class B
- Durability 7 Years (unprinted)

- MD5-100** White Gloss
- MD5-101M** White Matt

Metamark MD5A-B – High Performance Blockout Vinyl with 'MetaScape' System

Metamark MD5A-B features the 'MetaScape' adhesive system, offering faster and easier application by providing air with an exit route from under the graphic, with greater repositioning during application. This is combined with a grey pigmented solvent-based adhesive to provide increased opacity and preventing the substrate colour showing through. Metamark's high performance 70 micron white face film with its distinctive coating technology produces outstanding print performance on Solvent, Eco Solvent, UV and Latex printers.

Metamark MD5A-H – High Performance Digital Vinyl with High Tack ‘MetaScape’ System

The high tack adhesive of MD5A-H has been developed to apply to ‘difficult to stick to’ surfaces, smooth low energy plastics such as PE and PP, and for interior wall décor applications*. With the added benefit of the ‘MetaScape’ adhesive system, offering faster and easier application by providing air with an exit route from under the graphic. MD5A-H delivers outstanding print performance through the combination of Metamark’s distinctive coating technology, and high performance grade polymeric calendered film. (* For use on smooth, sealed interior walls – refer to the Wallcoverings application guide.)

- 70 Micron Polymeric Calendered Vinyl
- ‘MetaScape’ Solvent-Based Adhesive
- Layflat PE Liner
- Fire Rating Class B
- Durability 7 Years (unprinted)

MetaWrap MD-X – Cylinder Cast Digital Wrapping Media with Blockout 'MetaScape' System

MetaWrap MD-X is a 50 micron Cylinder Cast digital wrapping media, supplied with the **MetaScape** air release adhesive system to allow quick and easy application on compound curves as well as moderate recesses. The soft film has been developed to flow and conform over the most challenging surfaces so it's ideal for total vehicle wraps. The grey blockout adhesive ensures vibrant graphics and minimal substrate show through, as well as clean removal. The film offers high levels of dimensional stability and brilliant colour reproduction on Solvent, Eco Solvent and Latex printers.

Metamark MD-WA – WallArt

Metamark 'WallArt' offers an ideal solution for printable wall coverings, including retail and leisure, exhibition and home décor applications, enhancing the opportunities available for wall decor. The textured weave finish provides an attractive appearance without lamination, and gives a highly vibrant print image. It retains greater intensity of the colours compared to traditional textile or paper based products. The PVC film has high level of opacity, and makes for no show-through on overlap joins. The MetaScape air release adhesive allows for ease of handling and a clean trouble-free installation. It is printable with Solvent, Eco Solvent, Latex and UV printers.

Metamark MD-CV100 – Clear Vision (Perforated One-Way Film)

Metamark MD-CV100 is a perforated one-way vision film, supplied on a multi-layer release liner to offer improved print performance on Solvent, Eco Solvent, Latex and UV printers. It has 40% open area and 1.6mm perforations. It is suitable for advertising applications on vehicles and buildings, maintaining visibility from the inside. The black/white laminate has a clear adhesive to maintain full visibility through the holes. It can be applied on lightly curved surfaces like some rear windows of cars but it is not aimed to be deformed in 3D. Overlaminating is recommended to maintain visibility in wet weather.

- 140 Micron Perforated PVC
- 1.6mm Perforations, 40% Open Area
- Removable Solvent-Based Adhesive
- Fire Rating M1 and B1 Certified
- Durability 2 years (Unprinted)

Metamark MD-CR – Optically Clear Polyester Window Film

Metamark MD-CR is a 50 micron clear polyester window film that offers an optically clear finish when applied to glass. The ultra-clear adhesive system is permanent and allows wet application and clean removal in the short term. For transparent window graphics the product offers greater clarity than a PVC or self static cling and can produce high definition images. It can be printed in reverse and applied to the inside of the glass, for point of sale and advertising.

- 50 Micron Polyester

Metamark M7 Etch

Metamark Crystal, Dusted, Silver Etch and Opal Haze – Premium Etch Glass Films

Metamark's premium quality etched glass effect vinyls are available in four distinctive finishes. Each of these window films provide a striking effect when producing decals, graphics or for architectural use when covering complete areas of glass. The permanent solvent adhesive allows wet application and clean removal. Crystal Etch offers a distinctive glitter effect, Silver Etch gives higher opacity and greater definition for text, while Dusted Etch is more subtle and provides a higher level of visibility.

Technical

Metamark drives continual product improvement through a managed process of innovation and refinement. The result is a range of media that performs, and fully delivers the potential of modern printers and ink.

Our technical advances deliver productivity improvements too. Our METAScape adhesive innovation makes application to large substrates expands faster and more reliable by making trapped air easy to remove. Our Apex Assured adhesives make our media easy to apply and reposition, and build to a reliable ultimate bond. And when you need to remove applied media, you'll be glad it's Apex Assured too. Removal is fast and clean.

Metamark's technical leadership is all the assurance you need that you can't buy better performance, better results, or better overall value.

Metamark digital media works.

Metamark digital media, is broadly compatible with all of today's wide format printers and with Solvent, EcoSolvent, UV and Latex inks. Our media is engineered to extract the widest available gamut, to exhibit excellent resolution holding ability, and to support reliable drying or curing.

Our conversion processes ensure that our media is, clean and ready to print. Precise trimming and consistently managed winding tension produce reliable tracking and transport even in continuous production.

Metamark digital media is specified for quality and performance reference testing by leading printer and ink manufacturers. Metamark media provides consistent results and delivers the best all round performance available from modern hardware and inks.

Support

The technical section www.metamark.co.uk/technical on our website provides extensive resources for our products. The information and downloads are comprehensive and continually updated, and include the following:

- Free ICC Colour Profile downloads
- Technical Data Sheets [pdf]
- Application Advice
- Troubleshooting
- Printer Compatibility
- Colour Palette Libraries

For help or advice call 0345 345 5645 or contact by email technical@metamark.co.uk. As one of the leaders in digital printing, we have the knowledge and experience to provide the support required.

Getting the most out of your media

Metamark Digital media has been developed to ensure that you get the highest quality results, consistently, from your printer. There are a number of simple rules to follow to get the most from your media as follows:

Handling and Storage – Media can pressure-mark if stored on its side, resulting in discolouration bands in the finished print. Avoid this by storing on end, and do not leave for long periods on the unwind rollers on the machine. Always ensure the media is free from dust and contamination, shown by dark specks or marks in the finished print. Store ideally at +10°C to +30°C and 50% R.H.

ICC Colour Profiles – Always use the correct profile for media. This will ensure prints free from banding or bleeding, and will ensure accurate colour reproduction. The Metamark profile library on the web site provides simple download bundles for each printer and RIP combination.

Retained solvents from the printing process affect the media - Allowing a minimum of 24-48 hours after printing for the solvents to evaporate before cutting, overlaminating or applying. Solvents weaken adhesives, soften vinyl films and can cause overlamine to fail.

Always choose the right product for the application –The substrate and application each place different demands on the media. For example, considerations should be made for vehicle contours, low energy surfaces, areas requiring fire ratings, and for 'print and cut' applications. Always refer to the web site and data sheets before choosing the media or application.

The durability shown refers to the unprinted media. For the durability of the finished print, refer to the ink and printer manufacturer.

MetaSure Warranty

Digital Products

Metamark (UK) Limited warrants to its customer that graphics and markings produced using Metamark Digital Media and / or Metamark Digital Laminates will remain in satisfactory condition for a term no less than that defined as the expected life of the inks used in the production of the warranted graphics and markings by the inks' manufacturers and as documented in the ink manufacturers' official statements detailing durability: or the expected life term of the Metamark Digital Media and / or Metamark Digital laminate as detailed in Metamark's technical bulletins if the stated expected life term is less than that of the ink used.

If within the term as outlined above, Metamark, at its sole discretion, judges that graphics and markings produced using its Digital Media and / or Digital Laminates, and manufactured and installed or fitted in accordance with its published methods and best practices, as published and amended from time to time, have suffered unacceptable degradation as defined below, Metamark will provide sufficient Metamark Digital Media and / or Metamark Digital Laminate to enable the production of replacement graphics or markings, such replacement Digital Media and / or Digital Laminates being provided at no cost.

Metamark further warrants that its Digital Materials and Laminates will be supplied free of defects incurred in manufacturing and undertakes to replace, free of charge, any materials it judges to be defective upon examination.

This warranty specifically excludes degradation and damage which Metamark judged to have been caused by improper application or unacceptable use, chemical or malicious damage or negligence, poor storage or handling.

Metamark will not be held liable for any further direct or consequential losses, implied or otherwise.

Metamark's culture is environmentally aware. We're driven to find continual improvements in minimising our overall impact and to deliver products reflecting best practice in the industries we serve and supply.

All Metamark products are REACH compliant.
