Metamark. The Materials Company

Metamark media and materials are trusted the world over. Metamark is specified by leading brands, and chosen by signs and graphics producers looking for quality, technical leadership and value. Metamark media and materials are seen everywhere there's business to promote, messages to communicate and quality to maintain.

Technical leadership and Innovation.

Metamark's advanced manufacturing and conversion processes produce reference-quality media and materials. Metamark's innovation delivers next-generation developments too, such as our Apex and MetaScape systems.

Metamark single component, fully cross-linked Apex adhesive means easier application and repositioning, superior ultimate bond on a wide range of substrates, and reliable, clean removal.

Our MetaScape system allows you to work faster on large coverage areas by enabling air to quickly disperse from beneath the applied material.

Buy Direct

Metamark manufactures and sells direct. Place your order before 6pm and it will be delivered the next working day. Our stock position ensures that your needs are always met. Metamark has the media and materials you need in stock and ready to despatch.

Next Day Pre-Noon	Delivery Upgrade - add £3
Next Day Pre 10:30am	Delivery Upgrade - add £7
Next Day Pre 9:30am	Delivery Upgrade - add £15
Saturday Pre-Noon	Delivery Upgrade - add £8
Saturday Pre 10:30am	Delivery Upgrade - add £12
Saturday Pre 9:30am	Delivery Upgrade - add £20
Northern Ireland/Isle of Man £11.50	Free for orders over £130
UK Offshore £29.50	Free for orders over £200
Recorded Post £2.00	Only available on small items

Order direct from Metamark anytime up to 6.00pm for next day delivery with confidence that all materials are available from our comprehensive stocks. Additions can be made to orders at any time during the day and we offer a range of competitively priced timed delivery services. On each order the price band applied is determined by the total metreage or number of rolls on the order. You may add to your order as many times as required during the day. Your total order will determine the price break to be applied and whether the order qualifies for free delivery.

Orders to the UK mainland are despatched to arrive before 5.30pm the next working day. We also offer a range of competitively priced timed delivery upgrades. Deliveries to Northern Ireland and Isle of Man are 2 day, UK Offshore are 3-4 day, and these deliveries cannot be guaranteed.

Payment Methods

We will be pleased to consider opening a credit account which will allow payment at 30 days nett, subject to status, and we also accept payment by MasterCard and Visa credit cards and Maestro and Visa debit cards.

Sample Service

We understand how important it is to you to be able to provide your customer with the necessary colour samples the next working day. We offer free A4 samples which will be sent the same day by first class post if requested by 4pm.

Sales Office Hours

The Sales Office is open continuously from 09:00 to 18:00 from Monday to Friday.

Colour Selectors and Reference Tools

To allow accurate cross referencing to industry standard colours, it is possible to order the Pantone® formula guide and the RAL Guide with Metamark. There will be a cost associated to this request.

At Metamark we also produce our own colour swatches for different product ranges. Our swatches are available on request and are an easy to use pocket-size reference tool for the signmaker.

Metamark SignVinyl is nothing less than the perfect reflection of Metamarks' years of experience in making the best sign and graphic materials money can buy.

Our SignVinyl is designed to perform as well in your hands as it does in its intended application. So however complex the job and whatever the colour, Metamark SignVinyl cuts cleanly. We've made weeding easier too with performance tuned liners offering just the right release characteristics and adhesives that resist the effects which make other vinyls difficult to work with.

Metamark SignVinyl is always available in a huge range of contemporary and classic colours. So whether you need to produce signing that's a visually co-ordinated component of its surroundings, or something that's a powerful counterpoint, you'll get it done with Metamark SignVinyl.

Metamark SignVinyl is available in a range of performance types too. If you needed enduring long term quality in a challenging application environment, Metamark has the product you need. If you have a need for something that offers top quality in the medium term, Metamark is all you need to know.

Metamark SignVinyl is always on our shelves and ready to supply. Order what you need, when you need it. Count on Metamark – we keep the largest stocks – so you don't have to.

Opaque Sign Vinyls

Metamark 7 Series – High Performance Calendered Vinyl

Metamark 7 Series is a high performance calendered vinyl developed for vehicle graphics, window decals, and long term computer cut applications onto flat or slightly curved surfaces. The soft handle 70 micron face film offers ease of weeding, while the high grade solvent based adhesive allows wet application and clean removal. Exterior durability is 8 years for black and white, 7 years for colours and 5 years for metallic colours. Metamark 7 Series features the latest Apex adhesive for your assurance of high performance and clean removal from a permanent adhesive.

- **Durability up to 8 years**
- **70 micron Polymeric Calendered**
- **Permanent Clear Solvent Adhesive**
- **Fire Rating: Class B**
- **Suitable for flat or simple curves**

Metamark MM-CC – Colour Change Wrap Film

Metamark Colour Change film is a proven and highly effective full colour branding vehicle wrap solution for use on fleet, commercial and taxi applications. It offers high abrasion resistance and paint protection to preserve the market resale value of the vehicle at the end of the contract. The Apex adhesive ensures minimal residue on removal and so optimising the total project production time for each vehicle. The 100 micron film offers high opacity and resistance to elongation colour fade during the wrapping process. The pigments in the film give long term colour stability, providing a durable finish. It is supplied with MetaScape air release system to allow quick and easy application. MM-CC is available in a range of standard colours ex-stock, and is alternatively offered to colour match for minimum quantities, for specific branding opportunities.

- **100 micron Cylinder Cast Film**
- **Durable up to 8 years**
- **MetaScape Air Release Solvent-Based Adhesive**
- **Full Wrap Film for Commerical, Fleet and Taxi**

MetaScape Crystal, Dusted, Silver Etch and Opal Haze	Premium Etch Glass Films	4.3

Metamark Frost – Etch Glass Films

Metamark Frost is an opal etch effect vinyl suitable for glass manifestation and privacy screening, replacing traditional acid etching. The smooth, consistent finish provides a striking effect when producing decals, graphics or for architectural use when covering complete areas of glass. Metamarks' proprietary solvent adhesive system ensures sparkling results without a trace of adhesive visibility, and allows easy wet application.

- **Outdoor Durability 3 years**
- **80 Micron Etch Glass Film**
- **Permanent Solvent Adhesive**
- **Fire Rating: Class B**
- **Light Transmission 85%**

Etch Glass Effect

Metamark Crystal, Dusted, Silver Etch and Opal Haze – Premium Etch Glass Films

Metamark's premium quality etched glass effect vinyls are available in four distinctive finishes. Each of these window films provide a striking effect when producing decals, graphics or for architectural use when covering complete areas of glass. The permanent solvent adhesive allows wet application and clean removal. Crystal Etch offers a distinctive glitter effect, Silver Etch gives higher opacity and greater definition for text, while Dusted Etch is more subtle and provides a higher level of visibility.

- **Durability up to 7 years**
- **70 Micron Polymeric Glass Film**
- **Permanent Solvent Adhesive**
- **Fire Rating: Class B**
- **Light Transmission: Crystal 57%, Dusted 80%, Silver 56%**

Etch Glass Effect

MetaScape Frost – Etch Glass Films with MetaScape system

For faster, trouble-free application of glass manifestation, 'MetaScape' Frost offers ease of application by providing air with an exit route from under the graphic. Frosted glass window graphics with a smooth consistent finish can be produced, whether computer-cut or for total-coverage architectural applications. The product has an 80 micron monomeric calendered frosted film.

- **Outdoor durability up to 3 years**
- **80 Micron Etch Glass Film**
- **'MetaScape' Permanent Clear Solvent-Based Adhesive**
- **Fire Rating: Class B**
- **Light Transmission: 85%**

5 Reflective and Fluorescent

Metamark M5000 Reflective	Engineering Grade	5.1
Metamark Fluorescent	Promotional Grade	5.2
Metamark Exterior Fluorescent	2 Year Cast Grade	5.2

M5000 Reflective – Engineering Grade

M5000 series is a high quality engineering grade reflective suitable for safety signs and high visibility vehicle markings, where permitted. It offers ease of application due to its robust PET type film, so does not suffer the brittleness or tearing common to applying reflective materials. It has a 7 year exterior durability. It is suitable for application on flat panels or simple curves and can be computer cut. (Not suitable for use on compound curves or recesses.)

- **Durability 7 years**
- **120 micron PET Film**
- **Engineering Grade Reflective**

8 Solar Window Tinting Films

Window Tint Solar Film for Buildings / Vehicles 8.1

Window Tint – Solar Film for Buildings / Vehicles

These professional grade window tinting films are available in three finishes, for vehicle or architectural use. They reduce solar heat gain, light transmission and the effect of damaging ultraviolet rays. They can be used to provide one-way visibility or to improve the appearance of glass panels. All three films can be used on vehicles but only on the rear and rear side windows and they may also be used on other toughened glass. They may not be used on the windscreen or front side windows of vehicles. For building use, such as offices and conservatories V-MIRR may be used, where it's lower heat absorption minimises the risk of cracking. It is not to be used on wire glass. Care must be taking when fitting these films to glazing. In extreme cases the heat absorption and other factors such as shading can cause glazing to crack. If in doubt, contact the sales office for more advice. Performance data and application advice is shown on the data sheet available from www.metamark.co.uk

- **Durability 5 years Internal**
- **50 Micron Polyester Film**
- **Professional Window Film**

It is the responsibility of the installer to establish suitability of these films

Handling and Applying Sign Vinyl

Handling and Storage – Store vinyl on its end or suspended to avoid pressure marking, ideally +10°C to +30°C and 50% RH. The recommended application temperature for applying vinyl using a 'dry application method' is at least 10°C and for a 'wet application method' is at least 17°C. Application in temperatures below 5°C is not recommended.

Suitable Surfaces – Most smooth flat 'high energy' surfaces such as stainless steel, aluminium, glass or acrylic are suitable for Metamark Sign Vinyl. Low energy plastics such as polypropylene or embossed plastics are not suitable. Polycarbonate can present out gassing. Care is needed when applying to cold glass using a wet method, as tack levels will be very low. Powder coatings and other painted surfaces are ideal but paint must be fully cured first, and the paint must be correctly applied. Refer to website for more information; it is the responsibility of the installer to ensure the surface is suitable.

Films and Adhesives

Films – Calendered Vinyls may be applied to flat or slightly curved surfaces. They have a 'memory' so should be applied to curves without stress, and are not recommended for conforming into recesses by the use of heat.

Polyesters are semi rigid so should only be applied to smooth, flat or single curved surfaces. Reflectives comprise a glass resin composition so are very brittle on removal.

Adhesives – Metamark solvent based permanent adhesives allow trouble free wet application and long term durability in all conditions. These high quality adhesives allow relatively clean removal after use. Our repositionable adhesives provide a lower tack and clean removal in the short term. Solvent-free adhesives are water based, and wet application should be avoided to prevent them going milky.

Further advice can be found on our web site at www.metamark.co.uk/technical

Colour Selectors and Reference Tools

To allow accurate cross referencing to industry standard colours, it is possible to order the Pantone® formula guide and the RAL Guide with Metamark. There will be a cost associated to this request.

At Metamark we also produce our own colour swatches for different product ranges. Our swatches are available on request and are an easy to use pocket-size reference tool for the signmaker.

MetaSure Warranty

SignVinyl Products

Metamark (UK) Limited warrants to its customer that graphics and markings produced using Metamark SignVinyl will remain in satisfactory condition for a term no less than that defined as the expected durability as detailed in Metamark's technical bulletins.

If within the term as outlined above, Metamark, at its sole discretion, judges that graphics and markings produced using its SignVinyl, and manufactured and installed or fitted in accordance with its published methods and best practices, as amended from time to time, have suffered unacceptable degradation as defined below, Metamark will provide sufficient Metamark SignVinyl to enable the production of replacement graphics or markings, such replacement SignVinyl being provided at no cost.

Metamark further warrants that its SignVinyl will be supplied free of defects incurred in manufacturing and undertakes to replace, free of charge, any materials it judges to be defective upon examination.

This warranty specifically excludes degradation and damage which Metamark judged to have been caused by improper application or unacceptable use, chemical or malicious damage or negligence, poor storage or handling.

Metamark will not be held liable for any further direct or consequential losses, implied or otherwise.
